

DEP` NIEL SINAGA

JUNIOR WEB DEVELOPER

Palembang, Indonesia | depniels12@gmail.com | 085373199341 | <https://github.com/DepNielS> | <https://www.linkedin.com/in/dep-niel-sinaga-26202a309> | <https://dep-niel-sinaga.vercel.app>

SUMMARY

Informatics graduate and aspiring Junior Web Developer with hands-on experience building web, desktop, and mobile applications through internship, team, and personal projects. Currently focused on strengthening Web Development skills using JavaScript, TypeScript, React, Next.js, NestJS, REST APIs, and PostgreSQL. Interested in building practical applications and continuously improving software development skills through project-based learning.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML,

Backend: NestJS, Laravel, Go, REST APIs

CSS, Tailwind CSS

Database: PostgreSQL, Firebase, Drizzle ORM

Tools: Git, GitHub, Docker, Swagger, Electron

EXPERIENCE

Android Developer | CV Wijaya Lesmana Sejahtera (Internship) - Palembang, Indonesia | Jan 2023 - Aug 2023

- Developed an Android-based inventory management application for warehouse stock processes.
- Implemented incoming/outgoing goods features, transaction history tracking, and data synchronization through RESTful APIs.
- Performed application testing, bug fixing, maintenance, and feature improvements.
- Participated in client-side application installation and deployment.

ADDITIONAL EXPERIENCE

- Self-Employed | Terang Stationery - Palembang, Indonesia | Jan 2021 - Present
- Handled daily administrative and customer service operations, including document processing, printing, scanning, and transactions.
- Supported inventory and office supply organization while maintaining accurate daily documentation.

SELECTED PROJECTS

Indonesia Activity Center - Full-Stack Web Application - Personal Project

Tech: Next.js, TypeScript, Tailwind CSS, NestJS, PostgreSQL, Drizzle, JWT, RBAC

Built independently around a real-world entertainment business case covering Padel, Food, Wellness, and Events. Backend modules, REST APIs, authentication, RBAC, Swagger documentation, and API v1 are implemented;

github.com/DepNielS/Indonesia-Activity-Center.git

Water Meter Reading System - Desktop Application - Team Project

Tech: React.js, Electron, Go, PostgreSQL, Docker, YOLO

Contributed to dashboard, login, customer, meter reading, field officer, and reading recap interfaces plus database relationships between customers, area codes, and officer schedules. YOLO model development was handled by another team member.

My Task Manager - Personal Web Project

Tech: HTML, CSS, JavaScript, React fundamentals, LocalStorage

Personal project for strengthening React fundamentals, state management, event handling, task CRUD, search, filtering, and client-side persistence. Deployed to Vercel.
